PROFESSIONAL SUMMARY

Computer Science undergraduate and Full Stack Developer with hands-on experience in building scalable web applications using MERN stack. Skilled in developing REST APIs, authentication systems, real-time applications, database integration, and responsive user interfaces. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, and software development practices.

TECHNICAL SKILLS

Programming Languages: C++, Java, JavaScript, Python, SQL

Frontend Technologies: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, Bootstrap, Responsive Design

Backend Technologies: Node.js, Express.js, REST APIs, JWT Authentication, Authorization, Socket.IO, WebRTC

Databases: MongoDB, MySQL, PostgreSQL, Supabase

Developer Tools: Git, GitHub, Postman, VS Code, Vercel, Render

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, SDLC, Debugging

PROFESSIONAL EXPERIENCE

Full Stack Web Development Intern — Labmentix

Jul 2025 – Jan 2026

Bangalore, India (Remote)

- Engineered MERN stack applications by developing frontend modules, backend APIs, and database integration workflows.
- Delivered authentication, authorization, and CRUD functionalities while debugging application issues.
- Collaborated with a remote development team using Git/GitHub and followed SDLC practices.

PROJECTS

Mentor Bridge – Real-Time Mentorship Platform | [GitHub](#)

Dec 2025 – Jan 2026

MongoDB, Express.js, React.js, Node.js, WebRTC, Socket.IO, JWT

- Architected a full-stack mentorship platform supporting 100+ concurrent users with real-time messaging, video calling, and collaborative communication using the MERN stack.
- Integrated WebRTC and Socket.IO to enable low-latency (sub-150ms) real-time communication, with secure JWT-based authentication protecting 500+ user sessions.
- Developed 15+ reusable React components and scalable REST APIs following modular backend architecture, shrinking code duplication by 30%.
- Boosted application reliability by 25% through rigorous API testing, debugging, and a Git-based version control workflow.

MediCompare – Healthcare Comparison Platform | [GitHub](#)

Apr 2026 – Jul 2026

React.js, Node.js, Express.js, PostgreSQL, REST APIs

- Engineered a healthcare comparison platform enabling users to search and compare 50+ hospitals and medical services in real time.
- Implemented advanced search and filtering with optimized REST API integration, cutting average query response time by 35%.
- Redesigned database schema and query logic, strengthening backend performance by 40% and trimming load times across 10+ endpoints.
- Designed responsive UI components, elevating accessibility and lifting mobile usability score by 30% across desktop and mobile devices.

CareerPath AI – AI Career Recommendation Platform | [GitHub](#)

Feb 2026 – Mar 2026

Python, Flask, React.js, NLP, TensorFlow, OpenAI API

- Created an AI-powered career assistant analyzing 500+ resumes to identify skill gaps and generate personalized learning roadmaps.
- Integrated OpenAI APIs and NLP techniques, sharpening recommendation relevance accuracy by 35% over baseline keyword matching.
- Developed end-to-end recommendation workflows combining a React frontend with a Flask backend, minimizing API response latency by 20%.

EDUCATION

COER University, Roorkee, Uttarakhand

Jul 2023 – May 2027

B.Tech Computer Science Engineering

CGPA: 8.55

M.D.A.V Inter College, Saharanpur

Class XII: **81%**

Class X: **91%**

ACHIEVEMENTS & CERTIFICATIONS

Research Paper Presentation – ICMCE 2025 – Presented research paper on handwritten flowchart recognition using Large Language Models at TMU, India.

National Hackathon Participant – Developed healthcare and emergency response solutions with real-time tracking features.

Problem Solving – Solved 350+ Data Structures and Algorithms problems across LeetCode, GeeksforGeeks, and coding platforms.
